

Mohammad Fahim Hossain

Full-Stack Software Engineer

fahim.atul0@gmail.com | (+880) 1928296009 | Chattogram, Bangladesh

[GitHub](#) | [LinkedIn](#)

Summary

Full-Stack Software Engineer with 3+ years of experience designing and building enterprise software for international clients. Experienced in developing scalable web applications, RESTful APIs, database-driven systems, and business-critical solutions using modern JavaScript technologies. Proficient across the full software development lifecycle, from requirements analysis and system design to implementation, testing, deployment, and maintenance. Passionate about building reliable, maintainable, and user-focused software that solves real-world business problems.

Professional Experience

[OnTheGo Accountants](#), (FRIISBEE), UK

Software Engineer

Aug 2022 – Present

- Developed internal enterprise level software for accounting, HR management, and UK tax solutions using modern full-stack technologies.
- Progressed from Frontend Developer to Full-Stack Software Engineer, contributing across frontend, backend, and business workflows.
- Built OCR-powered bookkeeping workflows using Amazon Textract and Xero APIs to automate invoice processing and financial record management.
- Translated business requirements into scalable software solutions.
- Implemented scalable backend architecture and role-based access control applications.

[PCB Store](#), BD

Head Of Department Web Operations

Nov 2024 – Present

- Translated business requirements into technical roadmaps and supervised feature delivery.
- Led a cross-functional team of developers, SEO specialists, and operations staff to deliver new features and maintain platform reliability.
- Converted business requirements into technical implementation plans and supervised feature development from planning to deployment.
- Led the migration from a WordPress-based platform to a custom web application using PHP, MySQL, React, and Next.js.
- Supported a production platform serving **100K+ active visitors monthly**, focusing on scalability, stability, and operational efficiency.
